

LAMPTRON

FAN CONTROLLER -FC2-

Fan control for the perfect PC! Dial it! Flip it! Switch it!.... Control it!

The product can address the needs of enthusiasts that need to control more than four fans and fans of high wattage like Delta fans. Each channel supports up to 45 Watt, significantly more than others. The knobs are all shooting beautiful blue color LED light. It's your perfect choice if you want to adjust the fans speed. The FC2 is meant for the power user that wants the best!

● Attention: In order to afford the maximum power 270 Watt (45W*6), you can find three power -input ports which will be occupied depending on the load hooked up to the product. Make sure the input port is the branch of the same power otherwise something unexpected might happen on the product
